Field Bridge Custom XML installation

The Custom XML is the back end form for the Field Bridge, augmenting this structure is how the Run Form takes shape. The state of Mississippi has opted to change the layout of the run form in order to best suit their needs. Currently in the v3.8 the run form has to be manually installed in every Field Bridge that is used.

Here are the instructions on how to install the Mississippi custom xml:

1. Locate and open "my computer". Locate and open the c: drive
2. Follow this path;
    1. Program files
    2. ImageTrend EMS
    3. Database
    4. layouts
3. Copy the Mississippi_custom xml file (this is the file that is enclosed in the e-mail that also contains the Support Agreement) and paste it into the layouts folder
4. Close the c: drive
5. Open the FB application and login
6. Find the "Setup Application Preferences" on the left side of the home page
7. The first section of the Setup Application Preferences is called "current Form Layout" (this is a drop down), locate the Mississippi_custom xml and select on it
8. Select OK on the bottom of the "Setup Application Preferences" box to close the preferences section.
9. Logout of the FB
10. The next time that anyone logs into the FB they will have the Mississippi_custom XML as their default run form

*These steps are done after the FB initial Setup steps
